

# Spillrite Vacuums Wholesale EXPORT price List - 2013 Drum Pumps - pneumatic

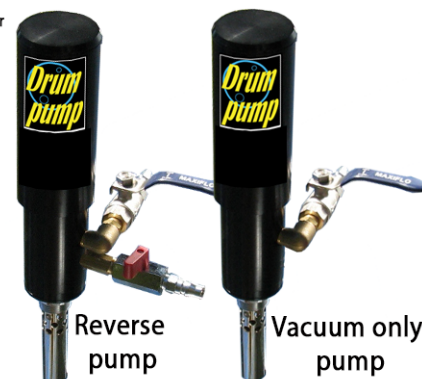

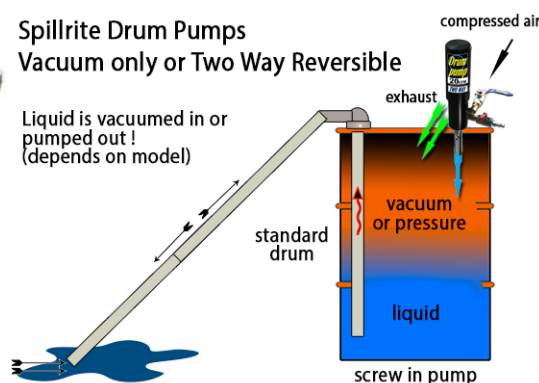

## Dragin drum pumps to Spillrite Drum Pumps

low noise, low air, spills, fluids, solids in fluid

### Spillrite Drum Pumps Vacuum only or Two Way Reversible

Liquid is vacuumed in or  
pumped out !  
(depends on model)

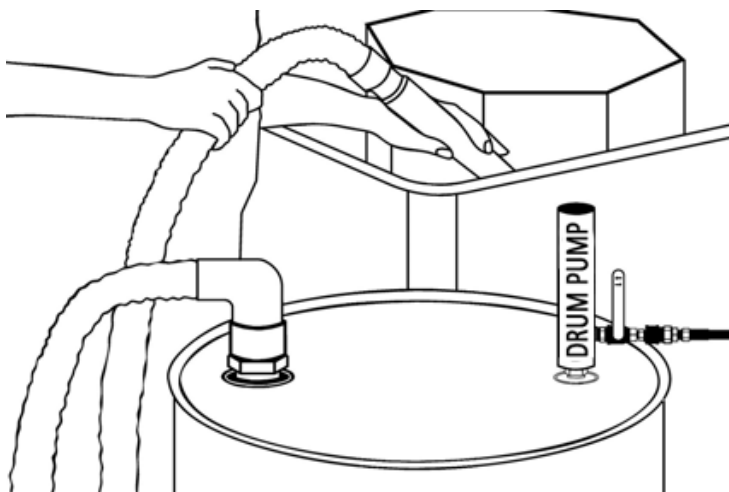

### The Spillrite Drum

**Pump** is an air operated vacuum pump that screws into the 3/4" bung on a steel drum. These pumps fit all standard steel drums worldwide including 20/44/55/205 drums. These high powered vacuum pumps fill a 44 in under 2 minutes. They have wide applications and are used in the oil and gas industry, marine, agriculture, farming, grain, chemical, automotive industries.

They can be used for flammable fluids, coolants, oils, grease, chemicals, spills, bilge and almost all fluids.

The reversible vacuum pumps have a unique design feature which allows pressure to be released through the venturi and exhaust which means they cannot over pressurize the drums making them completely safe in reverse pump out mode.

Great for the environment to, your filled drum can now be capped, labeled, and sent off for recycling. The whole process is a clean, simple and safe procedure. Being compressed air driven Spillrite Drum Pumps have no moving parts ! So there's nothing to burn out, this is a quality tool that will last for a long time in your workshop and it's Australian Made !

**Spillrite / Vacteck Price List - call 1 300 822 832 AUSTRALIA**

**For orders email: [sales@spillrite.com](mailto:sales@spillrite.com) fax: +61 7 55339515**

PO Box 227, West Burleigh, QLD Australia 4219
